

AMOL IPPAR

Software Test Engineer / QA Engineer (Manual Testing | API Testing | Postman | JIRA)

Pune, Maharashtra | +91 9766043761 | amolippar2003@gmail.com | linkedin.com/in/amol-ippar | github.com/Amolippar

PROFESSIONAL SUMMARY

Quality-oriented Software Test Engineer with strong CDAC PG-DAC foundations in Software Engineering, SDLC, STLC, manual test execution, and API validation. Skilled in designing comprehensive test scenarios, authoring test cases, executing regression and smoke suites, validating RESTful APIs with Postman, and verifying data integrity via SQL queries in relational databases.

TECHNICAL SKILLS

- Testing Fundamentals:** Manual Testing, Functional Testing, Regression Testing, Smoke & Sanity Testing, Integration Testing, System Testing
- Test Artifacts & Design:** Test Plan, Test Scenarios, Test Cases, Boundary Value Analysis (BVA), Equivalence Class Partitioning, RTM
- API & Database Testing:** Postman, REST API Testing (Status Codes, Headers, JSON Schema Validation), SQL Queries, Joins, Data Validation
- Defect Management & Tools:** JIRA, Bug Life Cycle, Bug Reporting & Severity/Priority Matrix, Git, GitHub, DevTools, MySQL Workbench

KEY TECHNICAL PROJECTS

Quality Assurance & API Verification – FleetPulse

Tech Stack: Manual Testing, Postman, REST API Testing, MySQL Database Testing

- Authored 80+ comprehensive test cases covering authentication workflows, vehicle reservations, and driver shift scheduling.
- Conducted rigorous API testing in Postman verifying HTTP response codes (200, 201, 400, 401, 403, 404, 500) and JWT token expirations.
- Executed backend database verification by writing SQL queries to ensure foreign key integrity and ACID compliance during concurrent bookings.
- Identified and logged 18 defects in JIRA with reproducible steps, expected vs. actual results, and priority classifications.

End-to-End Validation – AnnaRestro Ordering Platform

Tech Stack: Functional Testing, Regression Testing, Payment Gateway Testing, Cross-Browser Testing

- Validated critical customer order flow: table QR scanning, cart item quantity changes, coupon logic, and checkout.
- Performed end-to-end payment gateway validation with Razorpay test cards, verifying payment webhooks and signature errors.
- Conducted cross-browser and mobile responsive testing across Chrome, Firefox, and Safari on various viewport sizes.

Industrial Workflow Verification – Manufacturing Work Orders

Tech Stack: Negative Testing, Boundary Value Analysis, State Machine Verification

- Executed extensive negative testing on work order state transitions to confirm unauthorized stage skipping is strictly blocked.
- Designed boundary value test cases for operator work hours, machine tolerance limits, and line item production quantities.

EDUCATION & QUALIFICATIONS

Post Graduate Diploma in Advanced Computing (PG-DAC)

Centre for Development of Advanced Computing (C-DAC), Pune — Overall: 79.50% | Highest Marks in Database Technologies & SQL

Aug 2025 – Feb 2026

Bachelor of Engineering in Information Technology (BE IT)

Savitribai Phule Pune University (Anantrao Pawar College of Engineering) — Overall CGPA: 7.95 / 10

Completed: Dec 2024

Higher Secondary Certificate (HSC) — Science (PCMB)

Dayanand Science College, Latur — Specialization in Mathematics, Physics & Computer Science

Completed: May 2020
